

Mohit Soni

Software Engineering | Data Engineering | Distributed Systems | Backend Development | Python | SQL | FastAPI

📞 +91-6265207755 | ✉️ mohitsoni96705@gmail.com | 📍 Madhya Pradesh, India | 🔗 LinkedIn | 🐙 GitHub

Education

Vellore Institute of Technology (VIT), Bhopal

Integrated Master of Technology in Artificial Intelligence (CGPA: 8.88)

Madhya Pradesh

Oct 2022 – Jun 2027

Technical Skills

- **Programming Languages:** Java, Python, C++, SQL
- **Software Engineering:** Data Structures & Algorithms, OOPs, Software Design, Debugging, Multithreading Fundamentals, Distributed Systems Fundamentals
- **Backend & Systems Development:** FastAPI, REST APIs, Backend Development, Microservices, API Design, Linux, Git, Docker
- **AI & Data Systems:** Machine Learning, NLP, Data Pipelines, PyTorch, TensorFlow, Scikit-learn, Dataset Processing, Model Evaluation
- **Data Engineering & Processing:** ETL Pipelines, Data Processing, Workflow Automation, Data Validation, SQL Query Optimization, Structured Data Pipelines
- **Core Computer Science:** Operating Systems, DBMS, Computer Networks, System Design, Scalability Concepts
- **Developer Skills:** Problem Solving, Analytical Thinking, Performance Optimization, System Debugging, Collaboration

Internship Experience

Data Analytics & AI Intern

Oct 2025 – Dec 2025

Aaffinity Associates

Remote

- Designed and implemented scalable **data processing workflows and backend pipelines** using Python and SQL for automation and large-scale structured data processing.
- Built modular **ETL and data transformation pipelines** for cleaning, structuring, and processing large-scale datasets in workflow-driven applications.
- Scaled reusable **workflow automation utilities and backend processing modules**, improving operational efficiency and reducing manual processing overhead.
- Collaborated on debugging, workflow optimization, and iterative development improvements across scalable backend.

Projects

LLM-Powered RAG QA Platform [GitHub](#) | *Python, FastAPI, REST APIs, Data Pipelines, Vector Databases*

- Engineered an end-to-end **backend data processing platform** using FastAPI for document ingestion, retrieval workflows, and scalable document query systems.
- Built scalable **REST APIs, preprocessing workflows, and modular backend components** for transforming unstructured documents into structured retrieval-ready datasets.
- Integrated **retrieval workflows and backend processing systems** with FAISS/Chroma to improve query performance, dataset handling, and low-latency execution.

Legal Document Classification System [GitHub](#) | *Python, NLP, Deep Learning, PyTorch*

- Developed an end-to-end **document classification pipeline using PyTorch** on a custom legal dataset, achieving **83%+ classification accuracy**.
- Prepared and structured **large-scale textual datasets**, implementing preprocessing, tokenization, batching, and modular training pipelines for efficient document handling.
- Evaluated system performance using **accuracy, precision, and recall metrics**, improving classification reliability and preprocessing consistency across unseen datasets.

Bengaluru House Price Prediction System [GitHub](#) | *Python, Machine Learning, Data Analysis*

- Built an end-to-end **machine learning pipeline** covering data ingestion, preprocessing, modeling, and evaluation using structured housing datasets.
- Performed **feature engineering and data preprocessing**, handling missing values and improving overall robustness.
- Experimented with multiple **regression algorithms and hyperparameter tuning**, comparing model performance to identify optimal predictive solutions.

Achievements

- Solved **100+ Data Structures and Algorithms problems**, strengthening problem-solving, analytical thinking, and programming fundamentals.
- Achieved **5-Star rating in SQL on HackerRank**, demonstrating strong database querying and optimization capabilities.
- Designed automation workflows using **AI and no-code tools like n8n** to improve efficiency in repetitive data processing.
- Leveraged **GenAI tools** for coding, debugging, documentation, research workflows, improving productivity and development.

Certifications | Cloud, AI, Machine Learning

- Oracle Cloud Infrastructure Generative AI Professional & AI Foundations Associate.
- Applied Machine Learning University of Michigan (Coursera).
- Cloud Computing Certification NPTEL.
