

Mohit Soni

AI Engineering | LLM Systems | FastAPI | RAG | Backend APIs

📞 +91-6265207755 | ✉️ mohitsoni96705@gmail.com | 📍 Madhya Pradesh, India | 🔗 LinkedIn | 🐙 GitHub

Education

Vellore Institute of Technology (VIT), Bhopal

Integrated Master of Technology in Artificial Intelligence (CGPA: 8.86)

Madhya Pradesh

Oct 2022 – Jun 2027

Technical Skills

- **Programming:** Python, SQL, Java
- **Data Engineering & Pipelines:** ETL/ELT Pipelines, Data Cleaning, Transformation, Validation, Workflow Design
- **AI Exposure:** LLM APIs, Retrieval-Augmented Generation (RAG), Prompt Engineering
- **Data Analysis & Decision Support:** Pandas, NumPy, Exploratory Data Analysis (EDA), Statistical Analysis, Reporting
- **Backend & APIs:** FastAPI, REST APIs, API Integration
- **Databases:** PostgreSQL, MySQL, SQL Query Optimization
- **Machine Learning:** Scikit-learn, PyTorch, Transformers (Basic)
- **Tools & Platforms:** Git, Linux, Jupyter Notebook

Internship Experience

Data Analytics & AI Intern

Oct 2025 – Dec 2025

Aaffinity Associates

Remote

- Designed and implemented **data processing workflows and ETL pipelines** using Python and SQL, integrating structured data for scalable backend and analytics systems.
- Developed and optimized **complex SQL queries (joins, aggregations, filtering)** for efficient data extraction, transformation, and API-ready datasets.
- Performed **data cleaning, transformation, and validation checks** ensuring high data quality, consistency, and reliability for downstream ML and LLM workflows.
- Conducted **exploratory data analysis (EDA) on 50,000+ records** to identify trends and support data-driven decision-making.
- Built structured datasets and collaborated on **schema design, data requirements, and pipeline documentation** for scalable data and ML systems.

Projects

RAG-Based Intelligent Document QA System [GitHub](#) | *Python, LLMs, Vector Databases*

- Planned and implemented an end-to-end **RAG pipeline** for document ingestion, preprocessing, embedding, and retrieval using LLM-based workflows.
- Enhanced an **ETL workflow** to clean, chunk, and transform large-scale document datasets into vector embeddings for semantic search.
- Integrated a **vector database (FAISS/Chroma)** for scalable storage and low-latency similarity-based retrieval of documents.

Legal Document Classification System [GitHub](#) | *Python, System Design, Data Processing*

- Created a scalable **data preprocessing pipeline** for large unstructured legal text, enabling efficient ML-based classification workflows.
- Transformed unstructured legal documents into **structured and machine-readable formats** for model training and analysis.
- Improved data quality through **cleaning, normalization, and feature engineering**, enhancing consistency for downstream ML models.

E-Commerce Sales Data Analytics Dashboard [GitHub](#) | *Python, Pandas, Data Visualization*

- Built a scalable **data processing pipeline** to clean, transform, and structure raw transactional datasets for analytics and backend-ready usage.
- Utilized **SQL and Python** for aggregations, filtering, and trend analysis on large datasets, improving data accessibility and insights.
- Developed **data visualizations and reports** to highlight key metrics such as revenue trends and product performance.

Achievements

- Constructed automation workflows using **no-code tools (n8n)** during hackathons to design data integration pipelines and streamline data processing tasks.
- Achieved **5-Star rating in SQL on HackerRank**, demonstrating strong proficiency in complex queries, joins, aggregations, and query optimization.
- Solved **100+ problems on Data Structures and Algorithms**, strengthening logical thinking and problem-solving skills.

Certifications | Cloud, AI, Machine Learning

- Oracle Cloud Infrastructure Generative AI Professional & AI Foundations Associate.
- Applied Machine Learning University of Michigan (Coursera).
- Cloud Computing Certification NPTEL.
